

# Nuvuk Archaeology

**WHEN:** Saturday, September 24, 2005 at 1:30 pm  
**WHERE:** UIC Science Center  
**WHO:** ECHO Nuvuk Archaeology Students  
**HOST:** Jill Exe – Hopson Middle School

**ALL AGES WELCOME!!! Need a ride?**

*A van will be at Tuzzy Library at 1:00 p.m. to take people to and from the presentation.*

During the 2005 Summer Field Season, 8 North Slope Borough School District students were put to work excavating as part of the “Learning from the Past: Archaeology of Nuvuk” team. ECHO, UIC and BASC worked together to fund and provide logistical support for the field and lab work. During the six-week project students were introduced to many aspects of archaeology including the importance of studying the people and culture at the Nuvuk site, how to grid and document using surveyor’s equipment, and how to excavate and collect artifacts. Students collected artifacts, recorded notes and specific data, and cleaned and attempted to identify the pieces found. These dedicated students **Jessie, Diane, Ben, Krista, Rebekah, Jesstina, Josh,** and **Kyle** worked in less than comfortable weather and earned a wage for their efforts! Come take a photographic tour with us.

Brought to you by the **Barrow Arctic Science Consortium**
